

Cue Biopharma Appoints Industry Veteran Lucinda Warren as Chief Financial and Business Officer

February 12, 2026

BOSTON, Feb. 12, 2026 (GLOBE NEWSWIRE) -- [Cue Biopharma, Inc.](#) (Nasdaq: CUE), a clinical-stage biopharmaceutical company developing a novel class of therapeutic biologics to selectively engage and modulate disease-specific T cells for the treatment of autoimmune and inflammatory diseases, today announced that Lucinda Warren, who has served as Cue Biopharma's chief business officer (CBO) since September 2024, has been appointed chief financial and business officer (CFBO) effective February 9, 2026.

"The combination of Lucinda's financial and business acumen together with her extensive background makes the CFBO a key strategic partner in helping drive business growth and Company success, particularly as we aim to move CUE-401, our lead autoimmune asset, toward the clinic," said Usman Azam, M.D., president and chief executive officer of Cue Biopharma.

Ms. Warren added, "I am honored to serve Cue Biopharma in this capacity, and I look forward to continuing to support the Company's corporate priorities and to be a part of this dedicated team."

Ms. Warren has over 30 years of global experience in the pharmaceutical and biotechnology sectors. Prior to joining Cue Biopharma, she served as vice president of business development for Neuroscience and Japan Regionally at Johnson & Johnson, a healthcare products company, from 2014 to 2024, where she was responsible for end-to-end business development, including licensing, mergers and acquisitions, and alliance management. Her leadership was instrumental in optimizing resources, fostering high-performing teams, and cultivating strong relationships with stakeholders. Ms. Warren's extensive experience also includes significant roles at Janssen Cilag Australia and Janssen Biologics, where she led business units and managed global transitions, consistently delivering value through strategic transactions. She currently serves as chairman of the board of International School Services, contributing her expertise in finance and governance. Ms. Warren holds a B.S. in biological sciences with a minor in neurology from the University of Alberta.

About Cue Biopharma

Cue Biopharma, a clinical-stage biopharmaceutical company, is developing a novel class of injectable biologics to selectively engage and modulate disease-specific T cells directly within the patient's body. The company's proprietary platform, Immuno-STAT™ (*Selective Targeting and Alteration of T cells*) and biologics are designed to harness the curative potential of the body's intrinsic immune system without the adverse effects of broad systemic immune modulation. CUE-401, the company's lead autoimmune asset, is designed to act mechanistically both as a regulator of proinflammatory mechanisms, and as a master switch for regulatory T cell (Treg) differentiation to induce tolerance. It is a highly innovative, tolerogenic bifunctional molecule combining a TGF-beta breathing-mask moiety with Cue Biopharma's clinically validated interleukin 2 (IL-2) mutein in a single injectable biologic.

Headquartered in Boston, Massachusetts, we are led by an experienced management team with deep expertise in immunology and protein engineering as well as the design and clinical development of protein biologics.

Forward-Looking Statements

This press release contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements include, but are not limited to, those regarding: the company's belief regarding the potential benefits and applications of its drug candidates and programs, including the company's plans to further advance its differentiating Immuno-STAT® platform and lead autoimmune asset, CUE-401, toward the clinic; and the company's business strategies, plans and prospects. Forward-looking statements, which are based on certain assumptions and describe the company's future plans, strategies and expectations, can generally be identified by the use of forward-looking terms such as "believe," "expect," "may," "will," "should," "would," "could," "seek," "intend," "plan," "goal," "project," "estimate," "anticipate," "strategy," "future," "likely," "promise" or other comparable terms, although not all forward-looking statements contain these identifying words. All statements other than statements of historical facts included in this press release regarding the company's strategies, prospects, financial condition, operations, costs, plans and objectives are forward-looking statements. Important factors that could cause the company's actual results and financial condition to differ materially from those indicated in the forward-looking statements include, among others, the company's ability to maintain its collaboration with ImmunoScape; the company's limited operating history, limited cash and a history of losses; the company's ability to obtain adequate financing to fund its business operations in the near term and successfully remediate its current "going concern" determination that it does not have sufficient capital on hand to continue operations beyond the next twelve months; the company's ability to achieve profitability; potential setbacks in the company's research and development efforts including negative or inconclusive results from its preclinical studies or clinical trials or the company's ability to replicate in later clinical trials positive results found in preclinical studies and early-stage clinical trials of its product candidates; serious and unexpected drug-related side effects or other safety issues experienced by participants in clinical trials; its ability to secure required U.S. Food and Drug Administration ("FDA") or other governmental approvals for its product candidates and the breadth of any approved indication; adverse effects caused by public health pandemics, including possible effects on the company's operations and clinical trials; delays and changes in regulatory requirements, policy and guidelines including potential delays in submitting required regulatory applications to the FDA; the company's reliance on licensors, collaborators, contract research organizations, suppliers and other business partners; the company's ability to obtain adequate financing to fund its business operations in the future and ability to continue as a going concern; the company's ability to maintain and enforce necessary patent and other intellectual property protection; competitive factors; general economic and market conditions and the other risks and uncertainties described in the Risk Factors and Management's Discussion and Analysis of Financial Condition and Results of Operations sections of the company's most

recently filed Annual Report on Form 10-K and any subsequently filed Quarterly Report(s) on Form 10-Q. Any forward-looking statement made by the company in this press release is based only on information currently available to the company and speaks only as of the date on which it is made. The company undertakes no obligation to publicly update any forward-looking statement, whether written or oral, that may be made from time to time, whether as a result of new information, future developments or otherwise.
