

## Cue Biopharma Announces Upcoming Scientific Presentations at the Society for Immunotherapy of Cancer's (SITC) 36th Anniversary Annual Meeting

October 4, 2021

CAMBRIDGE, Mass., Oct. 04, 2021 (GLOBE NEWSWIRE) -- [Cue Biopharma, Inc.](#) (NASDAQ: CUE), a clinical-stage biopharmaceutical company engineering a novel class of injectable biologics to selectively engage and modulate targeted T cells directly within the patient's body, announced today three poster presentations at the Society for Immunotherapy of Cancer's 36th Anniversary Annual Meeting ([SITC 2021](#)), to be held both in Washington, D.C. at the Walter E. Washington Convention Center and virtually November 10-14, 2021.

### Presentation Details:

**Title:** A phase 1 trial of CUE-101, a novel HPV16 E7-pHLA-IL2-Fc fusion protein, alone and in combination with pembrolizumab in patients with recurrent/metastatic HPV16+ head and neck cancer

**Poster #: 438**

**Presenter:** Dr. Sara I. Pai, M.D., Ph.D., associate professor of surgery, Division of Gastrointestinal and Oncologic Surgery; Director, Translational Research in Head and Neck Cancer Massachusetts General Hospital, Boston MA

**Date:** Saturday, November 13, 2021, Poster Hall (**Hall E**) 7 a.m.–8:30 p.m. EST

**Title:** CUE-102 selectively activates and expands WT1-specific T cells for the treatment of patients with WT1+ malignancies

**Poster #: 720**

**Presenter:** Dr. Christie Zhang, Ph.D., senior scientist, discovery and translational immunology, Cue Biopharma

**Date:** Saturday, November 13, 2021, Poster Hall (**Hall E**) 7 a.m.–8:30 p.m. EST

**Title:** Targeting engineered interleukin-2 (IL-2) to antigen specific T cells via novel biologic platforms

**Poster #: 793**

**Presenter:** Raymond J. Moniz, associate director, discovery and translational immunology, Cue Biopharma

**Date:** Friday, November 12, 2021, Poster Hall (**Hall E**) 7 a.m.–8:30 p.m. EST

*ePosters will be on display on the SITC 2021 virtual meeting platform from 7 a.m. EST on Friday, Nov. 12, 2021 until the virtual meeting platform is closed on Jan. 9, 2022.*

"We look forward to presenting additional preclinical and clinical data that continues to validate the therapeutic potential of our IL-2 based CUE-100 series Immuno-STAT™ platforms and biologics," said Anish Suri, Ph.D., president and chief scientific officer of Cue Biopharma. "We believe the data demonstrated in these posters show great promise in selective and specific tumor targeting for the treatment of multiple cancers and other life-threatening diseases."

### About the CUE-100 Series

The CUE-100 series consists of Fc-fusion biologics that incorporate peptide-MHC (pMHC) molecules along with rationally engineered IL-2 molecules. This singular biologic is anticipated to selectively target, activate and expand a robust repertoire of tumor-specific T cells directly in the patient. The binding affinity of IL-2 for its receptor has been deliberately attenuated to achieve preferential selective activation of tumor-specific effector T cells while reducing potential for effects on regulatory T cells (Tregs) or broad systemic activation, potentially mitigating the dose-limiting toxicities associated with current IL-2-based therapies.

### About SITC

The **Society for Immunotherapy of Cancer (SITC)** is the world's leading member-driven organization specifically dedicated to improving cancer patient outcomes by advancing the science and application of cancer immunotherapy.

SITC is a 501(c)(3) not-for-profit medical professional society of influential research scientists, physician scientists, clinicians, patients, patient advocates, government representatives and industry leaders dedicated to improving cancer patient outcomes by advancing the science and application of cancer immunotherapy. Through educational programs that foster scientific exchange and collaboration, SITC aims to one day make the word "cure" a reality for cancer patients everywhere.

Currently, SITC has more than 4,650 members who represent over 35 medical specialties in 63 countries around the world.

Through emphasis on high-caliber scientific meetings; dedication to education and outreach activities; focus on initiatives of major importance in the field; and commitment to collaborations with like-minded domestic and international organizations, government and regulatory agencies, associations and patient advocacy groups, SITC brings together all aspects of the cancer immunology and immunotherapy community.

### About Cue Biopharma

Cue Biopharma, a clinical-stage biopharmaceutical company, is engineering a novel class of injectable biologics to selectively engage and modulate targeted T cells directly within the patient's body to transform the treatment of cancer, infectious disease and autoimmune disease. The company's proprietary Immuno-STAT™ (*Selective Targeting and Alteration of T cells*) platform, is designed to harness the body's intrinsic immune system without the need for ex vivo manipulation.

Headquartered in Cambridge, Massachusetts, the company is led by an experienced management team and independent Board of Directors with deep expertise in immunology and immuno-oncology as well as the design and clinical development of protein biologics.

### **Forward-Looking Statements**

This press release contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, that are intended to be covered by the safe harbor created by those sections. Such forward-looking statements include, but are not limited to, those regarding: the company's estimate of the period in which it expects to have cash to fund its operations; the company's belief that the Immuno-STAT platform stimulates targeted immune modulation through the selective engagement of disease-relevant T cells; and the company's business strategies, plans and prospects. Forward-looking statements, which are based on certain assumptions and describe the company's future plans, strategies and expectations, can generally be identified by the use of forward-looking terms such as "believe," "expect," "may," "will," "should," "would," "could," "seek," "intend," "plan," "goal," "project," "estimate," "anticipate," "strategy," "future," "likely" or other comparable terms, although not all forward-looking statements contain these identifying words. All statements other than statements of historical facts included in this press release regarding the company's strategies, prospects, financial condition, operations, costs, plans and objectives are forward-looking statements. Important factors that could cause the company's actual results and financial condition to differ materially from those indicated in the forward-looking statements include, among others, the company's limited operating history, limited cash and a history of losses; the company's ability to achieve profitability; potential setbacks in the company's research and development efforts including negative or inconclusive results from its preclinical studies, its ability to secure required U.S. Food and Drug Administration ("FDA") or other governmental approvals for its product candidates and the breadth of any approved indication; adverse effects caused by public health pandemics, including COVID-19, including possible effects on the company's trials; negative or inconclusive results from the company's clinical trials or preclinical studies or serious and unexpected drug-related side effects or other safety issues experienced by participants in clinical trials; delays and changes in regulatory requirements, policy and guidelines including potential delays in submitting required regulatory applications to the FDA; the company's reliance on licensors, collaborators, contract research organizations, suppliers and other business partners; the company's ability to obtain adequate financing to fund its business operations in the future; operations and clinical the company's ability to maintain and enforce necessary patent and other intellectual property protection; competitive factors; general economic and market conditions and the other risks and uncertainties described in the Risk Factors and in Management's Discussion and Analysis of Financial Condition and Results of Operations sections of the company's most recently filed Annual Report on Form 10-K and any subsequently filed Quarterly Report(s) on Form 10-Q. Any forward-looking statement made by the company in this press release is based only on information currently available to the company and speaks only as of the date on which it is made. The company undertakes no obligation to publicly update any forward-looking statement, whether written or oral, that may be made from time to time, whether as a result of new information, future developments or otherwise.
